

Kitchen Exhaust Cleaning Service

Kitchen Exhaust Cleaning Service

Koorsen Fire & Security has learned from the restaurant industry the importance of thorough kitchen exhaust inspection and cleaning. We have incorporated three key elements as part of our professional cleaning service to ensure we are the first choice for our customers:

- 1) Our professional kitchen exhaust cleaners have passed the Koorsen Fire & Security certification program taught by a Certified Exhaust Cleaning Inspector. We are a member of IKECA, a nationally recognized cleaning association.
- 2) Our 6-photo picture perfect program shows our customers the difference in our service, without the customer having to physically inspect all areas.
- 3) Our follow-up program provides a personal phone call to ensure we have met your expectations.

How does Koorsen Fire & Security differentiate themselves further?

- One-Stop Shop

We offer restaurants a one-stop shop from kitchen exhaust to the portable fire extinguishers. Our fire protection specialists can inspect the fire suppression system, portable fire extinguishers, and exit/emergency lighting after hours to avoid any business interruption in the kitchen.

- We Are Bonded

We are bonded for up to \$100,000 as an additional level of security for our customers.

- Grease Containment

We are an authorized distributor and installer of the Omni Containment system. This system prevents grease from saturating the surface of the roof and helps reduce potential roof damage.

- Additional Services

Koorsen Fire & Security provides fan belt replacement on a regular scheduled basis. We provide hinge kits for fans that do not meet the NFPA 96 requirements. We can also provide access panels for areas that require them to achieve a proper cleaning. Koorsen Fire & Security also offers pressure washing services to clean drive-thru areas, dumpster pads, parking lots, as well as other applications.
