

Low Voltage Systems

Low Voltage Systems

Koorsen Fire & Security is your full-service low voltage systems contractor. From our initial site survey (or review of your blueprints) to your final training, we provide the best value and strongest resource. Our designers, technicians and installers are fully trained on each system we install. We employ multiple designers certified by the National Institute for Certification in Engineering Technologies (NICET), as well as Registered Communication Distribution Designers (RCDDs). We look forward to partnering with you on your current and future projects.

Services & Qualifications

- Fire Alarm Systems: NICET certified fire alarm technicians on staff. Underwriters Laboratories (UL) certified fire alarm contractor.
- Intercom Systems: NICET certified audio technicians on staff. School and business communication systems provider.
- Pro-Audio Systems: Full in-house design capabilities and computerized sound modeling system. NICET certified audio technicians on staff.
- Structured Cabling: Data, fiber and RF distribution, design and certification. Full spectrum of test equipment.
- Security Systems: Access control, video surveillance systems, burglar alarm and perimeter security systems. 24-hour UL listed central station monitoring. Certified technicians and designers in each specialty on staff.

Structured Cabling Networks

Koorsen Fire & Security can provide total turnkey installations of structured cabling networks, including design, terminations and testing. Voice, video and data systems can be deployed within a single building or across a campus environment.

To provide installations that meet current industry standards, our technicians adhere to strict Building Industry Consulting Services International (BICSI) guidelines. Extended cabling warranties are available through various cabling or connectivity manufacturers.

Koorsen Fire & Security is the solution to all of your structured cabling needs, regardless of the project size.
